

Patent Application of Ray G. Files and Darryl L. Boyd Sr. for "LANDLINE TELEPHONES
CONVERTED TO TRANSMIT AND RECEIVE CELL PHONES
TELECOMMUNICATION" continued – page 5

CLAIMS: I claim:

1. Landline phones can be converted to transmit and receive cell phone telecommunication.
2. Landline phones can be converted to transmit and receive cell phone telecommunication without a landline service provider.
3. Landline phones can be converted to transmit and receive cell phone telecommunication with a landline service provider
4. Landline phones can be converted to transmit and receive cell phone telecommunication when an electronic device and cell phone are brought within general proximity of each other.
5. Landline phones can be converted to transmit and receive cell phone telecommunication with a switching circuit within the cell phone for activation.
